

The City of Gonzales
Storm Water Management Program
Annual Report
2018

Prepared By:
Jackie Baumann, P.E.
City of Gonzales, Chief Engineer

Introduction

The City of Gonzales Storm Water Management Plan has grown and evolved over the years. The SWMP is modified and improved as needed for effectiveness. The SWMP is administered by the DPW Director. Each year an annual report summarizes the goals and activities for the calendar year.

The City of Gonzales is a small community consisting of 11,094 people. Located on Interstate Highway 10 approximately 25 miles south of Baton Rouge and approximately 55 miles north of New Orleans, Gonzales' corporate limits encompass an area of approximately 5,800 acres or 9 square miles.

The City of Gonzales continues to experience commercial growth along the I-10 and LA 30 interchange, the LA 30 corridor, the I-10 and LA 44 interchange, and the US 61 (Airline Highway) corridor.

The topography of the city is generally flat and is traversed by three railroads, Interstate 10, US 61, and numerous state roadways. Four waterways cross the city. A very small section of Bayou Boyle/Bayou Conway crosses the southern tip of the city. Bayous Narcisse, Francois, and New River meander across the larger section of the city.

The City's storm water collection system is a combination of open drainage channels and subsurface drainage structures which convey storm water runoff into the four waterways mentioned above. These waterways generally flow from northwest to southeast. Waters entering the city limits originate in the unincorporated areas of Ascension Parish. After flowing through the city limits, these waterways enter back into Ascension Parish.

Program Element 1: Public Education and Outreach

The City of Gonzales City Engineer is responsible for this element of the program.

The goal of public education is to increase awareness of environmental protection through showing an increase in reach each calendar year compared to the previous year through the methods listed below:

1. The City of Gonzales facebook page now has 3,295 people who “like” the page and 3,309 people who “follow” the page and obtain notification updates. The 2017 volume was 2,763 like and 2,758 follow. These numbers show measureable increase of reach.
2. SWMP messages were posted to the city Facebook page March 21st (liked/loved 78 times, 13 comments, shared 37 times), April 4th, April 13th and November 9th. See page here: <https://www.facebook.com/City-of-Gonzales-Louisiana-70737-748776755172120/>

3. Storm Water Management Educational grant was offered to schools within the City. Gonzales Middle and St. Theresa schools both submitted lesson plans for environmental education. The Mayor and Council awarded proclamations to those teachers on November 26, 2018. A total of \$728.12 in storm water education classroom supplies was purchased by Gonzales. Students will receive their lessons in early 2019. Eighty-one 4th graders and 104 8th graders will each experience the environmental lesson funded by the

City. The teachers were presented the proclamation in recognition of their storm water grant award, commitment to teaching environmental awareness and dedication to Gonzales youth.

4. Ascension Household Hazardous Waste Collection day was advertised on City Facebook page and City website homepage (March 5th).
5. “Greenie Gonzales”, the Gonzales storm water mascot, was created in 2018 by a local youth artist. The artist was recognized at the Gonzales Council Meeting November 26, 2018. Greenie was introduced to the public November 9, 2018. He received a warm welcome across the internet and WAFB Channel 9 news story. See the story here: <https://www.wafb.com/2018/11/09/gonzales-th-grader-designs-logo-help-people-be-more-environmentally-conscious/>

6. City Council officially adopted the mascot at the November 27th council meeting. Three teachers were awarded \$500 storm water management grants with proclamation at the same meeting. See Advocate article covering the story here: https://www.theadvocate.com/baton_rouge/news/communities/ascension/article_8d165860-f1c7-11e8-8a51-ebaafa531c3e.html

Greenie Gonzales, Storm Water Mascot

7. Greenie and the City Engineer educated families about proper disposal of trash while they waited in line to meet Santa at the Gonzales Christmas event on December 4th. Additionally, the City website "Services" tab has a "Storm Water Management Plan" section which includes educational information. The website provides images of potential violations to help educate residents on how to identify storm water violations. See our web link for details:

<http://www.gonzalesla.com/services/storm-water-management-plan/>

Additionally, a citizen complaint form is linked to the website for easy access to residents.

<http://www.gonzalesla.com/wp-content/uploads/2015/08/Citizen-Complaint-Form.pdf>

2018 Educational Impact Documented

Educational Tool	Target Audience	Quantity	Total Reach	Frequency	Total
Educational Grants	School Age Childred	3 grants	185 kids 15 teachers	Annually	185
Christmas Outreach Event	Parents & Youth	741	741	Annually	741

Program Element 2: Public Involvement and Outreach

The City of Gonzales City Engineer is responsible for the public involvement and outreach portion of the Storm Water Management Plan. The City feels that public involvement is a direct result of public education. All activities listed in Program Element 1, Public Education are intended to stimulate activity within Program Element 2, Public Involvement and Participation.

The goal for public participation is to measure the following:

1. The volume of material recycled by curbside collection is shown in Table 1. The City provides recycling service free to Gonzales residents.
2. The volume of citizen debris work orders is shown in Table 1.
3. The volume of debris removed from public waterways is shown in Table 1.
4. The City of Gonzales funded two storm water educational grants. St. Theresa Primary and Gonzales Middle Schools submitted lessons that met the criteria shown on the attached grant informational flyer. The Mayor presented proclamations to both teachers on November 26, 2018.

APPLICATION REQUIREMENTS

Email jnickie@gonzalesla.com no more than one 8.5x11 page written explanation of the following information

- Summary of lesson plan incorporating pollution prevention/environmental health
- List subject which lesson will be taught: science, math, ELA, PE, art, etc
- Age group of children to receive the lesson pre-K – 12th grade
- School location must be in the Gonzales municipal boundary
- Anticipated number of children to experience the lesson
- Educational materials or classroom resources needed to convey the message: videos, books, games, papers, etc
- Quantity and cost estimate of all materials requested through the grant
- Maximum grant amount \$500
- Applications due October 1, 2018

SELECTION AND IMPLEMENTATION

The City of Gonzales will select up to 6 projects. Winners will be notified by October 31, 2018. All funded materials will be purchased by the City and delivered to the grant recipient(s) no later than January 6, 2019. Lesson must be completed by May 31, 2019. Grant recipients must submit photos of funded activity and total number of students to complete lesson.

EDUCATIONAL GRANT OPPORTUNITY

"The City of Gonzales is committed to educating tomorrow's leaders and protecting our environment. The City desires to incorporate stormwater pollution prevention into classroom activities and lessons. If you can include environmental health awareness into a classroom lesson, then the City would like to support your efforts by purchasing supplies or tools required."

WHEN IT RAINS
IT DRAINS

5. The City hosted the Gonzales Garden Club for their annual spring event held at Gonzales Jambalaya Park April 27, 2018. See article here:

https://www.theadvocate.com/baton_rouge/news/communities/ascension/article_c777e646-513f-11e8-a7dd-27307db6fe4f.html

6. A 3-D Greenie Gonzales statue was created and greeted all guests in line at the Gonzales Tree Lighting Ceremony Santa line. City Engineer stationed with Greenie to discuss proper trash disposal with children and their families. Prizes were given to those people who posed for pictures with Greenie and posted to social media #greeniegonzales (*Although lots of children were photographed with Greenie, we did not include their photos in this report because parental permission was not obtained.*)

Greenie on display

Youth Performers at Tree Lighting

Mayor Arceneaux
Councilman Boudreax

Santa with Greenie

Jambalaya Queen

City Engineer with Greenie

Another goal of the public involvement element is the City is encouraging residents to participate in enforcement of our SWMP. Educational sections of the City website show potential violations and provide methods for reporting suspicious dumping. See our web link for details:

http://www.gonzalesla.com/services/storm_water-management-plan/

Table 1
Residential Involvement Measurements

	2014	2015	2016	2017	2018
Volume of Material in Curb Side Recycling	172 tons	199 tons	205 tons	211 tons	214 tons
Number of Roadside Debris/Trash Work Orders (vegetative)	1,002 citizen pick-up requests (41% increase from 2013)	1,101 citizen pick-up requests	942 normal citizen pick-up requests 224 citizen pick-up requests from FLOOD Total Requests=1,166	1,207 citizen pick-up requests	1,442 citizen pick-up requests
Number of Large Debris Pick Ups (white goods and e-goods)	42 citizen requests	67 citizen requests	81 citizen requests	77 citizen requests	66 citizen requests

Program Element 3: Illicit Discharge and Elimination

The streets and drainage supervisor is responsible for this portion of the program. The City adopted an ordinance to govern illicit discharges and enforce penalties for this activity. The Illicit Discharge and Elimination program is regulated by City of Gonzales Ordinance Chapter 29: Stormwater Management: Illicit Discharge Detection and Elimination which can be viewed at: https://library.municode.com/la/gonzales/codes/code_of_ordinances?nodeId=COOR_CH29STMAILDI_DEEL

The goals for this element include:

1. Continue identifying any discharges through increased employee inspection and citizen awareness/cooperation with reports of illegal activity.
2. Continue inspecting the discharges and notifying any nearby residence or business of the discharge with a door hanger or notification to City Engineer.
3. Continue tracking illicit discharge locations to identify repeat offenders.
4. Continue checking for any repetitive discharge location, so a citation can be issued after a second offense.
5. Maintain strict enforcement.

Six city employees are certified to identify and enforce illicit discharges. The City has citizen complaint forms on the website and at city hall for residents to report illicit discharges. All city field employees are provided annual training during a regularly scheduled monthly staff meetings.

1. Mayor's citywide clean-up program was carried out the entire year 2018. Every Wednesday, all City field employees and the Central Services Director are required to perform trash pickup from 7:30 to 8:30 am. The City is divided into 4 zones, and each zone is assigned to a different department (water, sewer, street/drainage, recreation). Even employees not directly responsible for sanitation are required to perform trash clean-up each week along public roadways and bayous. This task also helps employees identify potential illicit discharges while cleaning the city.

Here is an image of trash collected from just one clean up crew (of 6 total crews) in one hour.

The volume of trash collected by City crews during Wednesday morning clean-up totaled 851 industrial bags, approximately 21,275 pounds in 2018!

2. Re-inspections of prior illicit discharge locations were completed in 2018 on random rotation. One prior violation site, Quaker Steak & Lube Restaurant, closed its business permanently. The existing issues at Hello Tokyo were checked on four occasions, and no new violations were found. However, a violation was found at Wild Wings May 14, 2018. Verbal notice was provided and site was remediated by the owner within two working days. Here are pictures of the violation:

3. All new structures constructed within the City have connected to the city sewer system. New permits totaled 22 commercial and 74 residential, and all structures have had sewer tie-in inspection by the wastewater department.

4. 385 total grease trap inspections were completed in 2018. Twelve inspections failed, were repaired by owners, and passed re-inspection. Four new food service commercial sites all received grease trap inspection upon installation Full grease trap inspection reports are attached.

Additionally, all new drainage outfall constructed in 2018 have been added to the GIS system to maintain its accuracy and help track any sources of illicit discharge. The City of Gonzales Fire Department is on hand to respond to any illicit discharge. The fire department staff are properly trained and equipped to handle any spill or call the forces required to handle the situation. The city

GIS system is available to the fire department personnel to use in identifying the path of potential contaminants found and any potential drainage paths that need to be secured.

It is the City's goal to remain aggressive with notifications and citations to violators. Eliminating repeat violators will help measure the effectiveness of this program element. Violations that were identified and corrected are attached.

With respect to city owned sewer facilities, it is the City's goal to continue ongoing, long term rehab to repair any leaks identified in the future. The 2018 sewer project includes a major expansion to the wastewater treatment plant to ensure that no overflows occur at the Environmental Enhancement Facility. The major sewer treatment plant construction is currently 60% complete with a total construction cost of \$6 million.

Since the city does not allow septic tanks within the City Limits, maintenance of the city sewer system (as quantified above) helps prevent and dramatically reduce illicit discharge from the system into the waterways.

Overall, the City drastically increased activity in this area by having field crews actively walking the roadways and bayous every Wednesday. The weekly clean-up project is being continued into 2019.

Illicit Discharge Statistics

Calendar Year	Illegal Dumping Citizen Reports	Illicit Dumping sites cleaned by City	Repeat Offender Inspections	Illicit Discharge Violations Issued	Violations Rectified
2017	25	25	36	3	3
2018	26	26	12	1	1

Program Element 4: Construction Site Runoff

The streets and drainage supervisor is responsible for this portion of the program, and the supervisor is assisted by four properly trained inspectors who are utilized as needed. One inspector is specifically assigned to storm water inspection. The City has an adopted ordinance to regulate storm water pollution prevention during construction activities and provide enforcement tools for anyone not in compliance. Construction and Post-Construction for New Development and Redevelopment can be viewed at:

https://library.municode.com/la/gonzales/codes/code_of_ordinances?nodeId=COOR_CH28STMADUCOPONSNEDERE

The goals for this program element include:

1. Provide continuing education for a minimum of 6 employees in construction site runoff inspection and maintain continuing education for this action.
2. Ensure the permit office personnel maintain the SWPPP permit process.
3. Maintain inspection activities to a minimum of every 14 days for all active construction sites.
4. Maintain the permit software to include SWPPP inspection.
5. Encourage residents to look for construction site violations and report any findings.

In order to make sure the City is working toward achieving these goals, the following actions were accomplished:

1. Six city employees are storm water certified and receive annual continuing education.
2. The My Permit Now software automatically includes a SWPPP inspection requirement in every new permit created.
3. Construction sites must pass a City of Gonzales SWPPP inspection which requires installation of all BMPs. The BMPs are inspected by the City prior to issuance of a construction permit.
4. Final occupancy permits are not issued until the construction sites are stabilized.
5. The City inspection software, My Permit Now, generates a work order assigned to the streets and drainage supervisor for every active construction site at the start of the permit. The inspector is required to complete this inspection and the inspection results in the software.

The City of Gonzales' goal is to have contractors understand the SWPPP conditions and cooperate with city inspectors to reduce pollutant runoff from construction sites. The city has made it a requirement to inspect all permitted construction sites to ensure SWPPP requirements are being observed. The long term goal is to reduce the number of violations by teaching contractors to properly install BMPs prior to construction.

The City feels the current SWPPP permit system is operating well and has prevented contractors from working on a site prior to BMP installation. The program is also forcing immediate action from those contractors notified of a SWPPP violation by placing a "hold" on inspections. The City Building inspector checks for storm water compliance during all inspections, regardless of the nature of the construction work.

Construction Inspection Statistics

Calendar Year	Residential Permits Issued	Commercial Addition/Renovation	New Commercial Permits Issued	New SWPPP Reviewed	Inspections Completed	Violations Issued
2017	104	21	16	16	502	3
2018	74	15	7	7	3,074	4

Additionally, the City has requested public assistance reporting any construction site storm water violations. Education and reporting information has been added to social media and the City website <http://www.gonzalesla.com/services/stormwater-management-plan/>.

In 2018, one major construction site was found to have storm water violation. The contractor was sent written notification and required to clean the job site prior to re-initiating work. Emails of the stop work notices and photos of the violation are attached. Three small sites were issued verbal notices and canceled inspections. The site were rectified by the next day in order to allow their inspections to proceed.

Program Element 5: Post Construction Site Runoff

The City of Gonzales regulates program element 5 using adopted City Code. This ordinance was adopted in 2010. The Gonzales Ordinance Chapter 28 Stormwater Management: During Construction and Post-Construction for New Development and Redevelopment can be viewed at:

https://library.municode.com/la/gonzales/codes/code_of_ordinances?nodeId=COOR_CH28STMADU_COPONSNEDERE

The streets and drainage supervisor is responsible for this program element. The certified inspectors which provide construction site runoff inspections also complete post construction site inspections.

Post Construction Inspection Statistics

Calendar Year	Alternative Inspections *	Repeat Offender Inspections	Violations Issued	Violations Rectified
2017	502	36	3	3
2018	3,074	12	4	4

*Indicates inspections for various construction types where the inspector will look for storm water compliance while onsite for another type of inspection

Please note that two of the repeat offenders were businesses that closed and went out of business, so there was nothing to inspect.

The City of Gonzales requires that all construction sites obtain full site stabilization before the building contractor can be released from the project, obtain occupancy permit, from the City of Gonzales inspectors.

Every construction site is tracked in My Permit Now software; therefore, sites are not able to “slip through the cracks” with respect to post construction site runoff protection. Should a site operate a commercial activity that could be higher risk for releasing a pollutant, these are all documented in the software. The City feels the new software is even better at project tracking and inspection tracking.

Additionally, Chapter 4 of the adopted Gonzales Comprehensive Plan involved land use, parks and open space. Conservation zones and protecting bayou rights-of-way are specific goals in the plan. To view the City's goals and objectives, view the Plan at www.gonzalesla.com and click “Master Growth Plan” at the lower right hand corner of the homepage.

The existing City landscape ordinance helps with enforcement of post construction runoff. To view the Ordinance, navigation to the City of Gonzales online code at

https://library.municode.com/la/gonzales/codes/code_of_ordinances?nodeId=COOR_CH22ZO_S22-4RUDEST Within the document, landscape regulations can be viewed in Section 22-4. All sites permitted in 2018 were required to construct landscaping and upgrade dumpster sites to meet our ordinance, even in a remodel or build-out of existing building. The construction under this ordinance is already making a noticeable difference throughout the City.

Program Element 6: Municipal Pollution Prevention / Good Housekeeping

The entire staff has an obligation to ensure good housekeeping practices are implemented and followed. Please see the Illicit Detection and Elimination Section of this report for the tremendous involvement of all DPW staff during weekly clean-up and inspection activities taking place throughout the City.

Education and training of city employees is a high priority. All administrative employees are required to attend training regarding the storm water management program. The handout used to train office personnel is still provided to all new office employees during their 90 day probationary period.

In order to aid all maintenance activities and efficiently manage city owned facilities, the City maintains a GIS system. One of the main data files accurately maps all storm drain and sewer facilities. This tool aids decision making capability for activities from everyday maintenance and asset management to spill prevention and containment of hazardous materials. The system is 100% up to date.

In general, the routine maintenance practices of each city department helps prevent storm water pollution as shown in the following sections.

The drainage department:

1. Inspects pipes, catch basins and drainage channels after rain events to look for obstructions. Any obstructions are immediately cleaned to ensure positive drainage.
2. Cuts grass on a regular schedule to ensure vegetation does not impede the waterways.
3. Cleans out drainage pipes and catch basins as needed using a blower.

Table 3

Miles of Ditches Cut	Volume of Material Cleaned from Culverts & Ditches
Roadside = 6.3 miles, Off-road = 5.1 miles	4,774 cubic yards (341 loads)

The street maintenance crew:

1. Sweeps streets on a regular basis including three days per week from 5 o'clock to 10 o'clock at night and on Saturdays. The debris is removed by means of a wet sweeper and disposed into a permitted landfill.
2. Picks up vegetative debris from the roadside. Chips the large woody debris and properly disposes to a certified vegetative debris site. 1,442 debris work orders were completed by City staff in 2018.

3. Picks up any trash and debris dumped along a public street or drainage right-of-way.

Table 4

Volume of Material Removed in Sweeping	Number of Roadside Debris/Trash Work Orders
58 cubic yards	1,442 pick-up requests from citizens

The building Maintenance department:

1. Empties trash cans in all public parks and facilities daily.
2. Prohibits pets from entering public parks and facilities.
3. Maintains at least two certified pesticide/fertilizer applicators at all times. Continuing education is required for the three applicators at least every three years.
4. Maintains all chemicals in a secure room at the maintenance department building. All chemicals are always properly labeled and applied.
5. Never applies fertilizer or chemicals just before a predicted rain event.

The wastewater department:

1. Inspects all grease traps within the city limits at least quarterly. 385 grease trap inspections were completed in 2018. All existing and new devices were inspected. Twelve devices failed inspection, and all passed subsequent re-inspection after owner repairs were completed.
2. Inspects all 50 sewer lift stations daily.
3. Annually contracts out between \$1,000,000 and \$3,000,000 in gravity sewer repairs to ensure infiltration is minimized. In 2018, over \$3,000,000 of gravity sewer repair and rehabilitation work was finished.
4. The final phases of work from the Gonzales DEQ loan is 60% complete. Construction is expected to finish in 2019 and complete \$15 million of sewer work over the past 6 years.
5. Continually trains all employees in the division on the procedure for spill cleanup and sanitary sewer overflow procedures. Securing or containing the spill and maintaining public safety is high priority. The training was held with wastewater staff on November 6, 2018 and with all field staff on November 9, 2018. Sign in sheets for this training is attached.

The fleet maintenance employee:

1. Stores all used oil properly. Used oil is hauled to final disposal by US Filter Company.
2. Used oil filters are also collected by US Filter for proper disposal.
3. Disposes of all trashed tires collected along roadsides and bayous at Chabill's Tire for proper disposal.
4. Checks all vehicles and equipment on a regular basis. Oil changes and inspection occur at least every 3,000 miles per vehicle.
5. Maintains a database of every city vehicle or piece of equipment to ensure that all are inspected regularly.
6. New GPS trackers were installed on Gonzales fleet to monitor idle running time and maintenance warning sensors. With the new technology, employees are not leaving vehicles running on idle during work and are forced by the DPW Director to have warning lights checked and mechanical failures repaired.

The City of Gonzales does not have a land use category for industrial land uses, so typical activities that trigger an LPDES permit or MSGP are not permitted within the City limits. Although the City of Gonzales Environmental Enhancement Facility does have DEQ Permit Number LA0109576 for Activity Number PER2015003, the receiving water for the discharge from this permitted facility is the Mississippi River which is **NOT** located within the City of Gonzales MS4 limits.

In conclusion, the City of Gonzales completes many activities which help protect the three major waterways in our municipal limits. Employees are trained to continually inspect facilities, handle spills properly, and clean up to prevent pollution from entering the storm water runoff. In addition to these activities, the City plans to continually improve their SWPPP by networking with other communities and continuing education.

Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Mayor Barney Arceneaux

Bill,

Alvin noticed significant erosion runoff from the Edenborne Connector Clearing operations (photos attached). The City is concerned about the silt entering the subsurface drainage system. Due to the potential stormwater violations, the City is requesting assistance from the Parish with the contractor. Can you please see that the inlets and roadway are cleaned and protected from sediment runoff?

The City greatly appreciates your assistance!

Sincerely,

Jackie
